AVG[®] Content Filtering

AVG® Content Filtering

AVG® Content Filtering allows you to increase productivity with advanced, real-time content filtering and the ability to block access to the websites that drain time and money from your business.

How does this benefit you?

Drive Productivity: AVG® Content Filtering helps you drive productivity by limiting access to social networking, searching and shopping to approved times. And, because less bandwidth is absorbed by personal use, that means more internet speed for your business tasks.

Protect against threats: AVG® Content Filtering prevents users from bringing security risks into the business by automatically stopping access to sites known to deliver spyware, malware and other threats. It also lets you automatically block sites by category with over 60 million sites sorted into subgroups and use flexible Block/Warn Only/Allow options to control the risk.
