

Corp IT Group

Your one stop solution for all your IT needs

Encompass Secure Plan

Complete Coverage for One Fixed Fee

Few things bring your workday to a halt like when the network is down. Consider how that adds up across the business. Each minute of downtime can cost hundreds, even thousands of dollars in terms of lost productivity and sales. What's more, these costs are only increasing, up some 41% from 2010 to 2013 according to a study by the Ponemon Institute. Downtime costs every business. What's it costing yours each year?

Our Encompass Secure Plan is designed to dramatically reduce downtime. It pairs comprehensive IT support that resolves network and device issues quickly, along with preventative maintenance that helps reduce the number of issues in the first place. In addition, it offers further support that covers a range of business-critical areas such as security, backup, and mobility—all offered alongside strategic IT planning to support your business as it grows and evolves.

With this approach, your business gets a complete IT service that keeps essential aspects of the business up and running, all through one point of contact and at one predictable cost.

Comprehensive IT for All Aspects of the Business

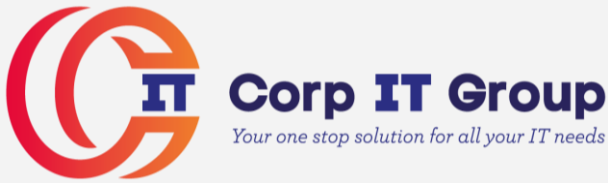

Features

- Preventative maintenance and performance monitoring of your core network devices.
- Proactive services, such as patch-level management, performed monthly (both on-site and remote).
- Patch-level management.
- Backup system monitoring.
- Corp IT Group's Cloud Backup Solution.
- Unlimited onsite and remote support for network, servers and workstations.
- Monthly health reporting and consulting to review the on-going health of your network.
- Monthly onsite CIO-level consulting meeting to help leverage technology for future growth and meet your unique business goals.
- Cylance anti-virus protection and monitoring for all servers and workstations (The Ransomware Killer).
- AVG Security Suite (Anti-Spam, Content Filtering, and Mobile Device Management).
- On-going internet connectivity monitoring.
- On-going firewall availability monitoring.
- Highest priority in the service queue.

Available Add-Ons

- Office 365 and Exchange
- AVG Secure Sign On
- Recovery Cloud (Disaster Recovery Service)

Benefits

Dramatic Reduction in Emergencies: A staff of experienced IT professionals will proactively maintain your network and devices on a regular basis and tune them for security, performance and availability.

Faster Repairs: Should a problem arise; the same staff is on hand to rapidly correct any issue. Diagnosis time is reduced from hours to minutes, with repairs made remotely or on-site as needed.

Unlimited Support: Unlimited support during business hours through multiple channels (email, chat, phone) along with the highest priority in the service queue.

Predictable Costs: A fixed pricing plan eliminates unexpected IT overhead by eliminating the need to scale your IT staff up or down to meet changing demands.

Access to IT Expertise: Our consulting experience ranges from the strategic to the hands-on level, which you can use to align the capabilities of your technology with the needs of your business.
