

Corp IT Group

Your one stop solution for all your IT needs

Pro Secure Plan

Staying One Step Ahead of the Problem

A rapid response when your network goes down is great, but tackling the issue before it becomes a problem is even better. Trouble is, that kind of proactive maintenance calls for extra time that many businesses simply don't have on their hands.

Our Proactive Secure Plan gives your network an extra level of ongoing attention. It's a managed plan that combines monitoring with a series of monthly preventative tasks to keep the business up and running, along with a host of additional IT services including technology consulting and discounted on-call support.

In all, this proactive approach keeps your network ready for business while recapturing the revenue your business loses any time there's an outage.

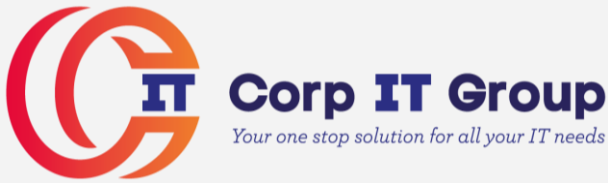

Network Monitoring, Reporting, Security and Preventative Maintenance Features

- Preventative maintenance and performance monitoring of your core network devices.
- Proactive services, such as patch-level management, performed monthly (both on-site and remote).
- Backup system monitoring.
- On-site support service at a discounted rate.
- 1 hour of remote helpdesk per month included.
- Monthly health reporting to review the on-going health of your network.
- Quarterly onsite consulting meeting to help leverage technology for future growth and meet your unique business goals.
- AVG Business anti-virus protection and monitoring for all servers and workstations.
- AVG Anti-spam protection and email performance monitoring.
- On-going internet connectivity monitoring.
- On-going firewall availability monitoring.
- Priority ranking in the service queue compared to Core Secure customers.

Available Add-Ons

- Office 365 and Exchange
- AVG Secure Sign On
- AVG Content Filtering
- Mobile Device Management
- Cloud Backup Solution
- Recovery Cloud (Disaster Recovery Service)
- Cylance Anti-virus (The Ransomware Killer)

Benefits

Far More Reliable Uptime: A staff of experienced IT professionals will proactively tune your network for optimal performance and availability, reducing slowdowns and emergency incidents.

Faster Repairs: Should a problem arise; the same staff is on hand to rapidly correct any issue. Diagnosis time is reduced from hours to minutes, costing you less than if you fixed it yourself.

Improved Service Overall: On-call IT support is offered at a discount, and your service calls get higher priority over customers who are on a Core Secure plan.

Lower Costs: A proactive approach to IT management eliminates unexpected IT overhead, and protects revenue once lost to network outages that effectively put businesses on hold.

Options

1 Year Plan

No Discount

2 Year Plan

4% Discount

3 Year Plan

8% Discount
